RAINS CAUSING BUCKLING UP OF STREET PAVING

Wood Blocks on Queen Street, Cracked By Heavy Trucks, Swell When Saturated

Queen street today for a distance of 100 yards or so in the business section resembles closely the torn-up floor of Kilauea's crater. Continued rains of the past four or five days have swelled the blocks that stand on end to form its wooden pavement, and these blocks, figuratively speaking, have put their crowded elbows together and lifted themselves into the air.

Four men under the guidance of a luna are now at work on the buckled-up street, tearing out with picks, axes and other instruments large sections of the wooden blocks in order to relieve the strain that is causing them to rise.

Not since the pavement was laid in 1908 has such a thing occurred, and road experts are entertaining different views regarding the best way to put the street back into proper shape. Mayor Lane says that twice in his memory the paving has buckled up slightly under heavy rains; but that never before has it risen high enough to tear itself apart.

It is believed by some that the proper way to overcome the present difficulty and keep it from spreading and taking in the entire street is to take out an entire length of the blocks on each side of the street next to the gutter, their places to be filled in with concrete. The blocks are about four or five inches wide, four inches high and eight inches in length.

Remove Crosswise Sections.
In addition to taking out sections of the paving along the gutters, it will also be necessary probably to take out sections at given distances crosswise with the street. This will insure room for the wet blocks to expand in all directions.

As a well known road worker explained today, this is not a sudden happening. It has been coming on gradually month by month, the street rising up here and there only to be pressed down by heavy trucks, with the result that each time the truck passed over the blocks are cracked slightly. The present rains have merely filled the cracks with moisture, and the swelling that followed soon had the street rearing up in many spots.

One interesting question that comes up in connection with the restoration of the street to a passable highway is whether or not the repair work necessitated will be greater than that provided for in the city statutes. Something will have to be used to fill in the large areas that have already been torn out by the workmen, and whether this material will be more than is allowed for road maintenance under the now famous Act 164 is causing a good bit of speculation. It is the general belief that concrete is the only sensible filling to use in these places, and concrete filling, according to the belief of some, will violate the road ordinance.

Engineer L. M. Whitehouse, who visited the section of Queen street at noon today where the wooden block paving is buckling up from the heavy rains, says that his plan for placing the street back in shape is to fill in the spaces where blocks of necessity have been removed, with a mixture of asphalt macadam. It is believed that enough elasticity will be found in the asphalt to take care of all further swelling. This will be temporary repair, being kept in only long enough to allow for more wooden blocks to be brought from the Puget Sound district.

BRITISH REFUSE GERMANS USE OF SHANGHAI CLUB

(By Associated Press.)

PEKING, China.—Numerous incidents of a disagreeable social nature are occurring in the foreign settlements in the Treaty Ports of China. The only foreign place of amusement in Peking, a moving picture show run by an East Indian British subject, was raided recently by some Austrian marines of the Austrian legation guard because a British "animated cartoon" was uncomplimentary to Emperor William and Faanz Joseph. But the most peculiar incident has occurred in Shanghai, where the German members of a club were requested to remain away from the clubhouse during the war. The overwhelming number of Britishers object to their presence. The Germans went to the club and took away many cups and other silver trophies, and are now retaining them, threatening to melt them into sycee (lumpy silver) unless their entrance fees and dues paid to the club are returned to them.

REVOLVER ON ANKLE GIRL'S LATEST STUNT

MILWAUKEE, Wis.—Some wear ankle watches, but Ida Jones wore an ankle revolver. Although she told Judge Page it was the latest style in woman's "apparel," he fined her \$5.

Because of a shortage of silver and copper coins, Russia will issue currency stamps.

TWO MORE FOREST RANGERS NAMED BY BOARD TODAY

E. H. Hipple to Patrol Manoa, Palolo and Nuuanu; Pililaau Given Waianae District

Two more forest rangers to protect the valleys adjacent to Honolulu, were appointed today by the board of agriculture and forestry, at its regular monthly meeting, which was attended by all the commissioners except W. M. Giffard. Those members present were Albert Waterhouse, president; Commissioners J. M. Dowsett, H. M. von Holt and A. H. Rice. Executive Officer C. S. Judd attended.

The two new rangers named this morning are E. H. Hipple, whose appointment becomes effective November 15, at \$25 a month, his territory including Palolo, Manoa and Nuuanu valleys; and John Pililaau, at \$20 a month, effective December 1, for duty in the Waianae district.

A. J. W. MacKenzie's bid for the construction of a fence around the Olua forest park reserve, Section B, was accepted. His bid was \$260. The fence will be nearly half a mile long. Its exact length is 44-200 of a mile. The fence is to be erected at Station 29 Miles, on the Volcano road. MacKenzie was the only bidder.

The board received a request from Eben Low for a hearing concerning disposal of sheep and goats on Rahuawae island, one of the forest reserves of the territory under control of the board. Mr. Low was the last lessee of the island for grazing purposes before it was designated a forest reserve. The board wishes to remove 75 sheep belonging to Mr. Low, and about 300 wild goats, and to take all stock from the island. Mr. Low desires to give information concerning his side of the situation. A date will be set later for the hearing.

Reports for September from the four divisions over which the board has charge, the departments of forestry, entomology, animal industry and hydrography, were presented, read and approved.

GREAT PROSPERITY IN AMERICA SURE, SAYS SWISS BANKS

BERNE, Switzerland.—The Swiss Bankverein, the most important banking institution in Switzerland, makes this comment on American conditions in a pamphlet just issued:

"The United States has recovered rapidly from the financial and economic crisis caused by the outbreak of the war. Obviously the country is approaching a period of great prosperity, owing to her rich harvests and uncommonly large exports—a degree of prosperity which has not, perhaps, been equalled in the economic annals of America."

"The United States can regard the future with confidence, as neither external nor internal policies cause any

lety or apprehension. It was really fortunate for Europe that the economic and financial resources of the United States have so well resisted all shattering events."

SHOT FOUR CHILDREN GATHERING APPLES.

PERU, Ind.—August Bion shot and killed Bert Sears, 12 miles east of

here, and wounded Mrs. Sears and her three children because the children were gathering apples on a farm Sears had rented from Bion.

Mrs. Sears and two of the children may die.

Bion, driving by the orchard on the farm he had rented to Sears, saw the Sears children, Harry, 15, Goldie, 11, and Dorothy 7, gathering apples. He fired on them with a shot gun.

Then he went to the Sears home and shot Sears through the body, killing him instantly, and shot Mrs. Sears. It is thought that Harry is the only member of the family who will survive. Poses are searching for Bion.

Herbert L. Samuel, the British postmaster general, announced the abandonment of the proposal to abolish half penny postal.

FREE LECTURE ON CHRISTIAN SCIENCE
